

INSTRUCTIONS CONCERNING THE SEMEN SAMPLE COLLECTION

1. URINATE into the toilet.

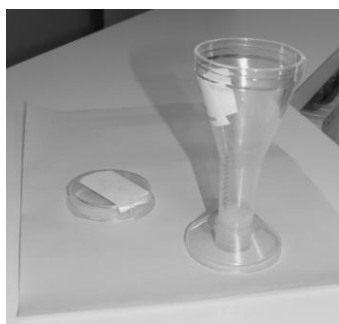

2. WASH thoroughly your hands.

3. DESINFECT the glans with the Dakin solution and DRY with a second sterile compress.

4. OPEN the provided sterile container without touching the inside and place lid on upside.

5. COLLECT all of the sperm obtained by masturbation into the container and close it. You should inform the staff any loss of any fraction of the sample.
6. Place the flask on the tray and leave it in the collection room.
7. After collection, please keep in touch with the person in the board next to the "AMP" waiting room"
